                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 221 AFG--TYATAEAAYSLAVGLAAQATKQSSIAVGSNAKAN-----AFAATAIGGNTVVN 271
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The present sequence represents an antigenic protein derived from Haemophilus paragallinarum strain A-221. The antigenic protein stimulates the production of Hi antibodies in fowl. The protein and DNA coding for it can be used in the preparation of vaccines for the prevention of chicken infectious coryza (CIC). The protein and its antibodies can be used in the diagnosis and treatment of CIC.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Antigenic polypeptide from Haemophilus paragallinarum induces HI antibody production - and is useful for diagnosis of and preparation of vaccines for chicken infectious coryza
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         1 MNHIYKVIFNKATGTFMAVAEYAKSHSTGGGSCATGQVGSVRTLSFARIAALAVLV---1 57

The present sequence represents a Haemophilus influenzae adhesin (Hia)

C protein from the non-typeable Haemophilus influenzae (NTH1) strain K9.

C protein from the non-typeable Haemophilus influenzae (NTH1) strain K9.

C Hia genes and proteins have antiinflammatory, auditory and antibacterial

c activities, and can be used in the production of a vaccine. An

c activities, and can be used in the production of a vaccine. An

c immunogenic composition comprising an Hia gene, a polypeptide encoded

c immunogenic composition comprising an Hia polypeptide is useful for inducing

c protection against disease caused by Heemophilus strains in a

c susceptible host, preferably a human. An Hia protein is useful as an

c antigen, in immunogenic preparations including vaccines, as a carrier

c for other immunogenic preparations including vaccines, as a carrier

c for other immunogenic acused by the infection of Haemophilus

is useful for treating diseases caused by the infection of Haemophilus

c influenzae such as meningitis, epiglottitis, septicamila and oithis

c media. Recombinant production of Hia favours high recovery of the

protein compared to the low recovery of native protein from Haemophilus

c influenzae species. A truncated protein has a significantly higher

c amount of recovery than a full-length protein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         56;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               1009 IDKDGTVFFGINTQSGLKAGDSTTLNNNGLSIKNTASNEQIQVGADGVKFAMVNNGVVGA 1068

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

OUTER MEMBRANE PROTEIN B PRECURSOR (168 KDA SURFACE-LAYER PROTEIN)
(SURFACE PROTEIN ANTIGEN) (CELL SURFACE ANTIGEN) (SCAS) (ROMP B)
(CONTAINS: 120 KDA SUBFACE-EXPOSED PROTEIN (SURFACE PROTEIN ANTIGEN)
(120 KDA OUTER MEMBRANE PROTEIN OMPB); 32 KDA BETA PEPTIDE).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ŏ
